Tour 1 has been specially designed to utilize the unique planetary energies that are available during early June 2012. As you read this text, you will come to better understand why we travel to the White Desert region of Egypt and the marvelous Coptic Retreat Center, north of Cairo, to enjoy a very special inner & outer journey and spiritual Pilgrimage.

We have called this Tour: *“Evoking the Gods & Goddesses of Ancient Egypt”*. No God or Goddess of Ancient Egypt was truly a universal energy without carrying the sign of the *Ankh* – The Key of Life. And as you look upon the Ankh or *looped cross*, found throughout Egypt, you will recognize that this is a symbol for the planet Venus – planet for Love, Beauty, shared creativity, cooperation, unity & marriage.

The Heavens can always inspire and unify our vision, and the transit of Venus, when she is seen to cross the face of the Sun, is certainly one of the key astrological features of the year 2012. This will be exact on June 6th. at almost 16-degrees Gemini – and is a rare event. It is a transit that symbolizes a re-evaluation of our world and its motivations, since Venus will be retrograde. Retrograde motion means turning inward and the journey through the Underworld. 2012 represents a further acceleration of the Great Awakening and completes the 8-year initiatory window we are experiencing.

Since the last Venus occultation occurred in 2004, there seems to have been a pronounced rise in global concerns surrounding climate change, sustainable energy, and the world economy. During these past 8 years, the rise of social networking, Facebook (2004) and Twitter (2006) has contributed to great cultural shifts, as we are now connected like never before. Venus is the planet of social contact, contact with Nature, the planet of Creativity & the Powers of Attraction. She has the most magical of all planetary cycles. She creates a 5 pointed Pentagram Star in the heavens with her five retrograde points within 8 years. The Pentagram is a powerful symbol both for Initiation (i.e. going in), Protection and for Manifestation.

June 2012 is one of those rare planetary events. The next time this Venus transit cross the face of the Sun occurs will be in 105 years – December 2017! And the one before 2004 & 2012 occurred in 1882! Since about 303 AD the Venus transits have been occurring in pairs and will continue to do so through to the year 3956. The last Venus Passage (pair) occurred in 1874 & 1882 and the next pair will occur in 2117 & 2125. Each Venus transit has its own unique Path, yet for hundreds of years they have been occurring in the signs of Gemini and its polar opposite sign Sagittarius. Thus these Venus passages over the face of the Sun alternate between these two signs in an elegant consistent pattern. Clearly these Cosmic Designs are educating us in unfolding evolutionary trends. Now although the majority of people prefer not to build bridges into the surrounding inner worlds, it is exactly this attitude which had led our societies to the global challenges we now have to face with awareness and consciousness.

The symbolism of the Twins in Egyptian Cosmology is very ancient, as they were the Guardians of the Heavenly regions, the Creator Gods, Shu & Tefnut, separating Heaven from Earth, which gave rise to male & female expression. Indeed, all the Egyptian Gods are “paired” up, married with each other i.e. Isis with Osiris, Horus with Hathor, Set with Nephtys, Ptah & Sekhmet etc. And this is something that we shall explore during our travels because it represents a major Key to the understanding of their Cosmology – and of life itself!

Sagittarius is linked with the One-pointedness of the arrow, duality now integrated and ascending towards its goal. Gemini is also linked with axial rotation of our Earth, so that the light of the Sun reaches every part of the planet, whereas Sagittarius is linked with the axial rotation of our entire solar system around the Galactic center located at 26-degrees of The Archer. The Venus Passages occur at the Galactic edge and so let us know that this extraordinary time for Initiation reaches beyond our Galaxy and extends far into the Universe. Planet Earth and the Solar System is coming

into a galactic synchronization with the rest of the Universe. This cycle has taken 26,000 years to complete. We know that we are living in a period of radical change.

Historically Venus transits over the face of the Sun have marked significant cultural changes around the world. Clearly it is no accident that we have chosen to be here on Earth at this time as witness to this Grand Cosmic unfolding. Our conscious participation, appreciation and awareness of these events help determine what is now seeking manifestation through what we are imagining and energizing in our hearts & minds. As Carl Jung reminded us, it is essential as conscious participants with this significant turning of the great galactic wheel that we *“dream the dream onward”*.

The Mayans, Toltecs & Aztec civilizations of South America & Mexico, as well as the Ancient Egyptians closely tracked the Venus cycle and the transits of Venus over the Sun because they knew these transits marked major shifts in the collective experience. The Mayan 5th. World finished in 1987 and the 6th. World starts in 2012. So we are currently “between worlds”. This time can be called the Time of Revealing. This means that the real truth will be revealed. It is also the time for us to work through “our stuff”, both individually and collectively. The Mayan Sixth World is actually blank – this means that it is up to us, as co-creators, to start creating the new world and civilization we want now. The Ancient Egyptians emphasized the same teaching in their Star Wisdom. They showed that the Gods are not brought down to Earth – rather, we are raised to the Gods. This is symbolized through the unifying principle of the Ankh, the marriage between our everyday world and the universal. There is much to enjoy from experiencing the ancient Egyptian culture regarding the Sun & Venus relationship, for one of the Sun-God Ra’s Eyes was given to his beloved daughter Hathor (representing Venus) for safe-keeping. Each traveler will receive a mythical story to unravel, for this will become one of the Keys to explore during our Journey.

There is indeed something extraordinary special about the start of June 2012 and the stimulus to the zodiacal sign of Gemini reveals to us that there will be a flourishing of new ideas, discoveries and connections.

Words convey information – symbols evoke experience and understanding. We take a symbol to be something that stands for something else. In Ancient Egypt, symbolism was a language, a precise science. It is often said that the human being is made in the image of God and that to understand the Universe is to explore deeply into one’s innermost Self. When we ask *“Who is God?”*, we are really asking, *“What is God?”*. The name does not tell us anything – one can only define “God” through the multitude of “His-Her” attributes/qualities/powers/actions. And the more we learn of these qualities (i.e. the different Gods & Goddesses of Egypt), the closer we are getting to our Divine origin.

The entire Tour 1 is therefore designed with this as the main focus – assisting each traveler to become the chosen instrument for one of the Gods or Goddesses during our 14 Day Journey.

And as we travel through Egypt to experience the many colours and richness of a civilization whose Light continues to shine and inspire generation after generation – we may indeed find ourselves becoming a GOLDEN ANKH KEY OF LIGHT & LIFE. Could we today, build a culture that would last thousands of years? What if we perceive that what for us today is a problem, had already been solved by the ancient Egyptians?

We shall be enjoying Shamanic Egyptian Astrology, Group Rituals and Meditations, as we make attunement to the Gods & Goddesses of Ancient Egypt, and make space in our everyday lives to welcome these transformative energies. We will be visiting some incredibly powerful energy places to experience the Inner Egypt. Come and join us during these increased days of Light during the magical month of June 2012 for an unforgettable 14-Day Adventure discovering Eternal Egypt!

Some people come to Egypt to see elegant buildings, ornate columns and towering pyramids. Others come for a deeper purpose – to experience their resonance. For the ancient temple builders, these structures were much more than beautifully crafted stonework – they were a series of harmonics designed by master craftsman to guide subtle forces into a defined space, whose ultimate purpose was to induce in the pilgrim a higher state of awareness. In other words, the Egyptian temples were, first and foremost, places for self-realization. Which brings us to this Tour. Each Temple was dedicated to a specific heavenly location or Fixed Star, which is why they are called Star Temples. Why this should be so, is all part of the greatness of Egyptian Cosmology, and as we move from temple to temple, we shall have a growing sense of their Plan to elevate the consciousness of Humanity - an influence that spread to all cultures & became the dominant force behind Western Esoteric traditions. In the Pyramid Texts of the temple of Edfu, it is stated that following a catastrophic global Flood, groups of builder gods named “*Akhu Shemsu Hor*” (“Followers of Horus”) re-established primordial mounds along the Nile, whose function was to act as foundations for the sacred places we see today.

We have designed this unique Tour to experience 9 fantastic Star Temples (*Meidum, the Red Pyramid of Pharaoh Snefru, the Luxor Temple of Man & the Macrocosmic Karnak, Medinet Habu, Hathor’s Denderah, Osiris temple at Abydos, the Pearl of the Nile, Isis’ temple on the island of Philae, plus Ramses 11’s temples deepest south at Abu Simbel on Lake Nasser*) to produce an unforgettable journey and unique to Younes Rejser. In just 10 intensive Days, you, the traveler, will experience what other travel agencies will offer over 3 such journeys!

As our Adventure unfolds, Derek will be sharing his experience of the Egyptian Star Wisdom and how this relates to each individual traveler. Naturally this will involve specially created Group Rituals and shamanic ceremonies along the way, all designed to create greater group consciousness and so open the inner doors to a wider perception. These 9 Star Temples represent symbolically the *Nine Eyes of Light* which are multidimensional perspectives and veils of consciousness that we are only partially using because we have forgotten our higher potentials. Just as we have our physical eyes and body, so too do we have other eyes or bodies that are as real in other dimensions. These other bodies allow us to sense, navigate and unify all parts of our human and divine selves. This unfolding work during our 10-Day Journey will bring each person into contact with Shamanic Egyptian Astrology, guided visualizations to explore your inner

landscape, the Star Wisdom of the Temple Science and seek to establish your Planetary relationship to the Gods.

The constant use of a sacred place imbues it with resonance, and this is how a place really becomes “holy” over the course of time. But that energy doesn’t come from the application of a spiritual science alone – it is the culmination of thousands of people venerating the sacred places over the course of time and leaving behind some of their integrity, so that future pilgrims may drink from that energy and maintain the eternal cycle. These Star Temples are then, not just masonry and stone – they are alive, they are living, breathing entities, living mirrors of the pure forces that bind them, even today. And as we walk through them, a little of that resonance is transferred to us so that we may, at the end, return to our daily lives feeling a little more inspired and whole.
